

ENGlobal Provides Update on Recent Automation Awards

HOUSTON, Feb. 6, 2014 (GLOBE NEWSWIRE) -- ENGlobal Corporation (Nasdaq:ENG), a leading provider of energy-related engineering and automation services, today reports on a range of project scopes that were recently awarded to its Automation Segment. The cumulative value of the awards to ENGlobal is in excess of \$10.0 million.

- An automated pipe handling equipment company has awarded ENGlobal additional projects to procure, integrate, and test a number of automated driller's cabins, which include consolidated drilling controls, automated pipe handling controls, programmable logical controller (PLC) hardware and data processing systems.
- A large engineering and construction firm has awarded ENGlobal a continuous emissions monitoring system (CEMS), which is specifically designed to meet the environmental pollution regulatory requirements for stack emissions and air quality standards.
- ENGlobal is providing design and integration services for several analyzer shelters and remote instrument enclosure (RIE) buildings to a large refiner. The Company's scope also includes engineering, procurement, and testing of the analyzer shelters and RIEs.
- A midstream master limited partnership (MLP) has selected ENGlobal as its automation systems integration contractor. Specifically, the Company is providing procurement, fabrication, and testing of process control shelters, PLC systems, railcar and truck loading/unloading facilities, and satellite stations.

"We are pleased to receive these project awards from both new and existing clients," said William A. Coskey, P.E., ENGlobal's President and Chief Executive Officer. "ENGlobal has been successful in marketing its new operational direction, as illustrated by these recent project awards. We are especially proud to showcase our midstream/downstream Engineering and Automation services and new-to-market upstream capabilities."

About ENGlobal

ENGlobal (Nasdaq:ENG) is a provider of engineering and related project services primarily to the energy sector throughout the United States and internationally. ENGlobal operates through two business segments: Automation and Engineering. ENGlobal's Automation segment provides services related to the design, fabrication and implementation of advanced automation, control, instrumentation and process analytical systems. The Engineering segment provides consulting services for the development, management and execution of projects requiring professional engineering, construction management, and related support services. Within the Engineering segment, ENGlobal's Government Services group provides engineering, design, installation and operation and maintenance of various government, public sector and international facilities, and specializes in the turnkey installation and maintenance of automation and instrumentation systems
