

ENGlobal Inc.
Sole Source Solutions Partner

Legacy Automation System Migrations & Retrofits

ENGlobal Inc. offer vendor independent automation platform migration expertise for DCS, PLC, HMI, and SIS systems. Our broad range of system platform experience provides a strong foundation for cost effective and practical solutions that increase operational excellence while reduction asset maintenance .

The ENGlobal sole sourced migration program provides the most comprehensive migration strategy in the market with a single source of responsibility for safely delivering your project within budget and on schedule. Our team will exclusively Manage, Survey, Engineer, Design, Program, Fabricate, Commission, and support the startup of your automation upgrade project.

Our experts are well versed at meeting corporate risk guidelines within reasonable budgetary constraints.

Our process expertise and advanced process control & multivariable process control experience sets us apart from the masses while providing our clients with the confidence that their forecast outages will have minimum impact on manufacturing production.

If you are struggling with determining the most practical approach to upgrading your obsolete hardware, networks, or software we can provide you with a clear path forward and business case to support your Automation project needs. From a single loop expansions to an entire plant retrofit. Count on ENGlobal to help convey the technical, commercial, and safety benefits that underpin your next upgrade, retrofit, or grass roots automation project.
